Important conditions

- All journeys start at Kyoto Station and use one bus without a vehicle transfer. They are sample options, not a claim of the fastest or cheapest route.
- Fares are for a single ride using cash or IC payment; no pass discounts are applied. Adult and child categories follow the operator rules (adult 12+, child 6–11 / elementary-school category).
- The arrival stop in a suggested journey is not necessarily the nearest stop identified by GIS analysis.
- This file contains no bus-route geometry, stop coordinates, verified OSM IDs or calculated walking distances. Match these fields to your GIS data before connecting the table to the map.
- Use these records for the sample journey information card. Keep the two main GIS analyses — attraction density and walking-network accessibility — separate from these published travel suggestions.
